CobraWrap SD Prod #11010
1 box = 19.5" wide x 52.5' long (630")
Pads per box = 60 pads
1 pad = 19.5" x 10"

- Cobra™Wrap is EPA (US) and PMRA (Canada) approved.
- Cobra™Wrap prevents and stops decay in wood poles at the groundline.
- Cobra™Wrap ingredients are recognized by the AWPA and CWPA as effective in the irradiation of fungal activity with the recommended load rates.
- Cobra™Wrap has a high penetration and retention level in the wood.
- Cobra™Wrap is a highly efficient delivery system that provides a longer lasting reservoir of active ingredients that assures more preservative to the wood.
- Cobra™Wrap is not only the most efficacious copper naphthenate-based preservative, but is the most cost effective when all cost factors are accounted for.
- Cobra™Wrap is the cleanest, safest and most efficient wrap on the market today.
- The unique Cobra™Wrap packaging system does not allow preservative to escape its intended use assuring that the active treatment penetrates the pole without leaching into the surrounding environment.
- Cobra™Wrap is safer to the applicator.
- In many states, utility workers can apply this product without an applicator's license.

 **Cobra**

INSTALLATION

- Installation is the quickest (fastest) of all products and there are no disposable pieces requiring special handling.
- Installation is simple and does not require technical based installers.
- Cut to size, peel off the inner layer (CobraWrap Standard) or cut diagonal slits every 2 to 3" in the inner plastic layer (CobraWrap SD), and tightly wrap around the base of the pole allowing only a small portion of bandage (2") to extend above the groundline.
- Quality assurance after installation can be done easily.

Cobra™Wrap SD

Slitting Pattern

ENVIRONMENTAL

- Low environmental impact and high worker safety, the Advanced Cobra System is compatible with “Greening” initiatives of your utility, the “community” it serves, and the regulatory agencies. Cobra™Wrap delivers beyond expectations to all shareholders.
- Cobra™Wrap exceeds all competitive treatment products in its eco- sensitive treatment of the environment.

EFFICACY DATA

Upon request, Genics will provide efficacy data to support Cobra™Wrap.
